

## Vision

---

A comprehensive animal welfare assurance program reflecting Canadian values, based on science-based national standards, and involving a suite of compliance activities sufficient to ensure domestic and international confidence in the welfare of farmed animals in Canada.

## Components

---

- ▶ a suite of timely national standards developed through a recognized process with wide input
- ▶ recognition and use of national standards across the country
- ▶ compliance activities such as quality-assurance programs, hot lines, education, extension and enforcement delivered by appropriately trained people
- ▶ means of tracking public values
- ▶ well targeted multi-disciplinary science
- ▶ sharing of information and best practices across jurisdictions and industries
